Subject: 95,613 Pentagon whistleblower complaints - Plus One

To my kids,

There is a bit of news going around about 95,613 Pentagon whistleblower complaints over the last five years and less than 9% of them were reviewed. A lot of it is due to \$21 trillion of misplaced funds. When numbers get that large, few care.

There are numerous articles on the subject and I link two below. The first is an easier read from a comedian and the second is a bit more in depth. Many more can be found.

The point of this is that if you point out waste of DOD funds you might be pressured. If you point it out to pseudo-Christian brothers, you might get fired and shunned by those in the institutional church. If you are also a flawed man, you have no hope from the system.

Except for the fact that my case was not formally reported and longer than five years ago, your dad is one of the 95K. It seems time to point again to my "Proverbs 1984" video.

Please, trust the Lord and not the institution. The Lord will hold on to His, the institution abandons all who don't fall in line.

I love you all.
